

WaveNET Presents...

# OmniBIS Entertainment Platform

WaveNET has developed a platform in which 'entertaining' options maybe presented to Mobile Phone users. These features are customizable and constantly modified and updated keeping in harmony with modern trends and changes in lifestyle.

## The EXTRAS

### Picture Messaging

This is the ability to send pictures to mobile phones. This is a very popular service and the picture messages stored on the WaveNET Database are constantly updated. We have several categories including the Top Ten Most Popular downloads as well as categorized pictures such as Christmas, Valentines, Words, etc.

e.g. -

### Sinhala / Tamil Messaging

These are SriLanka's native languages. This function is the same as Picture Messaging described above with difference being TEXT of these languages are sent instead. This is useful when considering the number of languages spoken worldwide.

e.g. -

## Ring Tones

Mobile users are given the choice of which ring tone to use on their mobile phone. Users are allowed to download onto their mobile phone their favorite tunes such that they could be used as their own mobile phone ring tone. A large database of ring tones is stored varying in languages also featuring Sri Lankan and Indian music.

## Send SMS

This is the ability to send an SMS message to any mobile phone using a website.
